DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

IN THE CLAIMS

In claim 1, line 11, after "one horizontal" please replace "canning" with – scanning --.

Allowable Subject Matter

2. **Claims 10 are allowed.**

The following is an examiner's statement of reasons for allowance: Claims 10 are allowed since certain key features of the claimed invention are not taught or fairly suggested by prior art. In claim 1, "wherein the data driver reverses the polarity of the gray voltages to be applied to the data lines of the liquid crystal panel by a predetermined number of rows, and biases the data lines to a voltage with a predetermined level before outputting the gray voltages to the pixels in each scanned row". The closest prior art data driver reverses polarities of the data voltages for pixels arranged on the LCD panel every frame. The frame inversion reversing polarity of the pixels is performed for preventing the deterioration of the liquid crystal. The gate driver includes a shift register, a level shifter, and a buffer, however, singularly or in combination with other prior art,

fail to anticipate or render, such as, at least 'biases the data lines to a voltage with a predetermined level before outputting the gray voltages to the pixels in each scanned row'“.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Murakami et al. (6,392,629 B1) teaches a drive circuit for liquid crystal displays.

Hirakata et al. (6,911,962 B1) teach a potential of data that is output from a data drive.

Kim (7,215,31 B2) teaches an LCD and driving method.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mansour M. Said whose telephone number is 571-272-7679. The examiner can normally be reached on Monday through Thursday from 8:30-6:00 P.M. The examiner can also be reached on alternate Friday from 8:30 a.m. to 5:00 p.m. EST. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard A. Hjerpe whose telephone number is 571-272-7681.
